

**UNIBODY  
MOPPING  
SYSTEM**

standard on  
the unibody:

- drain grate and spigot
- non-marking 3" ball bearing casters
- 35 qt. capacity with squeeze type wringer
- self draining spigot helps to prevent back injury due to heavy lifting
- sediment screen traps dirt, keeping water cleaner, longer
- bucket bottom slopes to ensure complete drainage
- bucket interior indicates quarts and litres for dilution measurements
- colour coded to prevent cross contamination
- large wide-mouth pour spout directs the water flow, controlling unnecessary splashing and spills
- designed to fit on most janitor carts for easy handling (#174)

\* order PN # 351 specify colour: yellow, blue, bronze, green or red

**CM13-3 BUCKET TROLLEY**

- structural plastic bucket trolley will accommodate two plastic or metal buckets with wringers
- standard with 3" casters for excellent maneuverability

CM13-3 Utility cart

Choose from our fine selection of mopsticks on page 67

**METAL MOPPING EQUIPMENT**

- **Continental** Hot Dip galvanizes each bucket after fabrication so all of the BUCKET is protected and it will not rust at the seams, edges or bends
- the results of this galvanization procedure assure years of dependable and worry free service.
- **WRINGERS** are zinc electroplated, ensuring years of rust and corrosion free service. These metal wringers are compatible with all 26, 32, 35 and 44 quart plastic and metal buckets on the market. One-piece ergonomic handle increases leverage to help protect operator from back injuries. Maximum venting allows for quick water release into the bucket without splashing.
- Continental mopping equipment meets or exceeds GSA specifications, RR-W-670D, RR-M-1075A and RR-B-800E.
