ZRPLR150 - plastic riser, 5” center hole (1 1/2” high)

**Note: Certain products, sizes, colours may not be regular stock items. Please contact our order desk for complete details. Custom sizes may be available as special order, please inquire.**

**How to break in a carpet shampoo brush:**

Before using a new brush on carpeting, the brush should be broken-in according to the following directions. This will eliminate possible drag by “tipping” the strands, removing any possible burrs caused by the manufacturing process

**Procedure:**

1. Mount brush on floor machine according to your machine owners manual

2. Find a rough textured floor surface, preferably unfinished concrete
3. Operate the machine on this surface. Run the machine DRY for approximately 5-7 minutes. The brush fibers should take on a slight set or lean in the direction of machine rotation.
4. Rinse brush to remove any dirt caught when running machine

**The brush is now ready to be used on carpeting**
