

G482

## ENZYME CARPET PRESpray BIODEGRADABLE, NON-TOXIC

### DESCRIPTION:

An excellent rug pre-spray and carpet cleaning solution for use in combination with hot water extraction equipment. It is based on a blend of selected micro organisms and enzymes which digest organic stains while providing instant odour control on contact. The product is particularly pleasant to work with as it contains no solvents or harsh chemicals.

### DIRECTIONS:

Pre-spotting: Check for colour fastness, remove excess soil, apply the solution with a fine mist or spray diluted with up to 10 parts of warm water. Allow 10 to 20 minutes contact time before cleaning with hot water or steam extraction equipment.
