

WIDE AREA VACUUM CLEANERS

Clean larger areas more efficiently with these Wide Area Vacs.

- Five-position height adjustment for maximum cleaning efficiency
- Heavy-duty, dust retentive felt cloth outer filter
- Large capacity disposable paper filter bag
- Top-fill system eliminates clogging at intake while assuring maximum pickup performance.
- Chevron brush with “no fling” brush barrier directs dirt and debris into vacuum inlet
- Heavy duty welded steel frame
- Ideal for hotels, schools, airport and bus terminals, office buildings, hospitals, conference centers, shopping centers and malls, libraries, churches, department stores or any large area vacuum requirements

WIDE AREA VACUUM CLEANERS

SV240P and SV280P Features

Choose from 24" or 28" cleaning widths ideally suited for vacuuming large carpeted areas. While being easy to maneuver and operate, the SV240P and SV280P remove embedded dirt and debris leaving carpets clean and groomed. Equipped with a chevron pattern balanced brush with eight rows of brushes, dirt and debris is moved towards the center and into the vacuum inlet for maximum pickup. These units are equipped with a wrap-around bumper to protect walls and furniture from damage. A folding handle allows for convenient storage and transportation. The Cog/3 Track V-belt drive system offers increased torque to the brush while enhancing the CFM of the machine. The heavy duty construction of a welded steel frame mounted on a structural foam housing provides added strength and durability, yet is lightweight with excellent mobility.
